

## BOMB SUPPRESSION BLANKET

Bomb Suppression Blanket with Safety Circle provides the bomb technician with light weight, highly protective and portable bomb handling equipment. The Bomb Suppression Blanket with Safety Circle are designed to contain lower velocity splinters upon detonation.

Bomb Suppression Blanket with Safety Circle when used together, eliminate the direct contact with a bomb and provide a safe environment for the disposal of explosive devices. The Bomb Suppression Blanket has heavy duty nylon webbing handling straps which permits the safe placement over a potentially explosive device.

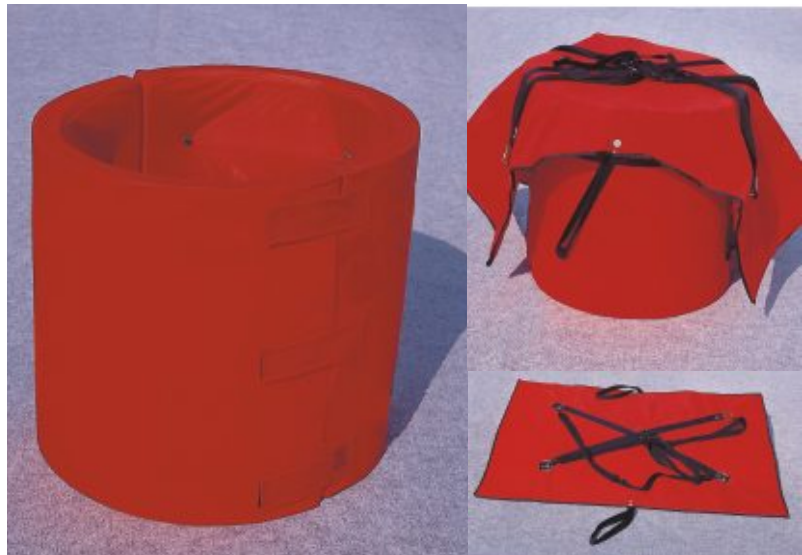

### TECHNICAL SPECIFICATIONS

F3 level of protection V50 at 550 m/sec.  
Made out of Ten layers of Kevlar Aramid Fabric

### SAFETY CIRCLE

24" height, 24" diameter  
Made out of 10mm thick Polycarbonate Sheet and with Kevlar Aramid Fabric.

Size	Weight
(100 x 130cms);	15 Kgs;
(150 x 200cms);	20 Kgs;
(200 x 200cms)	25 Kgs

Tested, Evaluated and Approved by TBRL, DRDO Laboratory, Government of India.

## BOMB TROLLEY

Bomb Trolley is made out of 6mm thick Bullet Proof-Steel, which withstands Burst fire of AK-47 Assault Rifle and SLR-7.62mm ammunition. The Trolley/Basket is manufactured as per Motor & Vehicle Act. It is having leaf springs and shock absorbers for smooth and jerk less travelling. The net made out of Kevlar Aramid fabric is fitted inside the trolley so that unidentified object/bomb remains suspended. The trolley is having toeing facility also.
