

# TELESCOPIC EXTENSION MIRROR SURVEILLANCE PERISCOPE MIRROR

**Model TM-007**

**Model ISP-007**

Inspection Mirror makes you see and be safe while looking around corners through doorways, overwalls and under ledges without putting yourself in danger. Inspection mirror lets you establish visual contact quickly and maintain it safely, without risk of physical exposure.

Inspection Mirror is having adjustable convex/plain mirror which maximises the field of vision. The near side plain mirror gives the advantage of viewing the object under observation without causing any neck fatigue. Asthpecially designed handle provides fatigue free long duration search operations. Adjustable self contained torch mounted on a telescopic rod provides sufficient brightness for night time viewing.

- Light Weight
- Maintenance Free
- Easy to understand/operate
- Adjustable Torch Mounting
- Distinct Vision
- Excellent tool during search operations
- Inspection Mirrors are designed and manufactured as per Customer's requirement also
